

CDK Training

Unlock your employees' full potential

CDK Training

A successful dealership relies on employees who truly understand the technology that runs it. Investing in training and certification for your employees is a key element to success.

CDK Global offers a **blended training approach** throughout its learning journey. This includes:

- Learning through exploration in our hands on workshops, led by a trainer at one of our academies
- eLearning in a simulated Autoline Drive system
- Online competency testing

The Learning Journey

The CDK Global training team will take you through a carefully devised learning journey, guiding you step by step through to Professional Certification. You can find out more about the Learning Journey by contacting the training team.

Our Training Methods

The Academy based workshops are led by a fully qualified trainer, many have direct dealership experience and are on hand to answer any questions you may have. Using real-life scenarios and hands-on exercises to reinforce learning, you will be guided through a role-specific Learning Journey.

You'll learn through exploration, making the workshops challenging but fun.

4 Workshop(s)

These workshops are accompanied by our eLearning tool **iLearn**. iLearn allows you to monitor your Learning Journey progress through a personal account available 24 hours a day.

This blend of learning will ensure that you are in control of your learning at each step. With regular competency testing on iLearn throughout the journey you'll know when you are ready to move to the next step towards completing your Certification.

6 Certified User

User and Professional Certification

Prove your understanding in the final stage in your learning journey, get yourself certified! Our certification has been carefully designed to benefit both you and the dealership.
